

Saqib Sohail

SENIOR FULL-STACK ENGINEER · FRONTEND-LEANING FULL-STACK ENGINEER

 Berlin, Germany  saqib@ssohail.com  +49 1522 6550321 [LinkedIn](#)  [GitHub](#) 

PROFILE

Saqib has delivered production web applications across civic-tech, nonprofit and early-stage product environments. His strongest frontend technologies are React, Next.js and TypeScript. He has hands-on backend experience in Django, FastAPI, Node.js and Ruby on Rails. He has experience modernising legacy systems, improving accessibility and performance, and owning AI-assisted product features from interface and API design through deployment.

EXPERIENCE

Senior Full-Stack Engineer

08/2025–05/2026

VELSA TECHNOLOGIES

End-to-end delivery of an AI-assisted contract product across a React and TypeScript interface, Django application backend, FastAPI AI service and production integration.

- Designed the application flow and service integration for an AI-assisted contract workflow connecting a React/TypeScript editor, Django backend and FastAPI AI service.
- Built a browser-based contract editor supporting merge fields, inline option controls and conditional clauses.
- Developed a conversational workflow that collected structured user input and populated contract content through backend APIs.
- Designed and deployed a FastAPI service integrating LLM inference and vector retrieval with the existing Django platform.
- Integrated Stripe payment and webhook flows for contract purchasing and controlled document access.

React · TypeScript · Django · FastAPI · LLM integration · Vector retrieval · Stripe

Front-End Developer

08/2019–04/2025

TACTICAL TECH

Frontend delivery and modernisation for public-facing platforms serving international audiences, researchers, educators and civil-society organisations.

- Owned frontend delivery and modernisation across 5+ public-facing platforms.
- Migrated 3 legacy applications to Next.js and Nuxt.js.
- Reduced initial load times by 30% through code splitting, lazy loading and frontend optimisation.
- Refactored Decap CMS content architecture, reducing editorial workflow time by more than 50%.
- Partnered with product, design, research and editorial teams.
- Translated complex research and educational content into accessible, maintainable web experiences.
- Contributed to WCAG 2.1 AA compliance.

React · Next.js · Vue.js · Nuxt.js · Decap CMS · WCAG 2.1 AA

Durch die Stadt GmbH

EARLIER EXPERIENCE

Worked on 360-degree city and retail portals, REST APIs and responsive components.

- Built full-stack features for city and retail portal experiences.
- Worked with mapping, relational data and responsive frontend components.

Ruby on Rails · Vue.js · Nuxt.js · PostgreSQL · Mapbox · REST APIs

TurboAd GmbH

EARLIER EXPERIENCE

Worked on relational data modelling, query optimisation and test-driven development.

- Developed server-side application features in Symfony and PHP.
- Worked with relational data models, query optimisation and test-driven development.

Symfony 3 · PHP 7 · PHPUnit · Doctrine ORM · MySQL

Octasolutions

EARLIER EXPERIENCE

Built full-stack applications, admin dashboards, role-based authentication and responsive frontends.

- Delivered application features across server-rendered and browser interfaces.
- Built admin dashboards and role-based authentication flows.

Ruby on Rails · MySQL · JavaScript · Bootstrap

CAPABILITIES

Product interfaces

React · Next.js · TypeScript · Vue.js · Nuxt.js · Responsive interfaces

Application services

Django · FastAPI · Node.js · Ruby on Rails · REST APIs · Stripe integrations

Data and AI integration

LLM inference · Vector retrieval · Structured input flows · PostgreSQL · MySQL

Quality and delivery

WCAG 2.1 AA contribution · Frontend performance · Legacy modernisation · Test-driven development · Docker · GitHub Actions

SELECTED OPEN-SOURCE PROJECTS

Jobs Tracker Bot

An asynchronous aggregator monitoring 11 remote job boards, classifying NGO roles and sending Discord and Telegram alerts.

Python · GitHub Actions · Docker

Web Crawler Dashboard

A URL analysis application with crawl feedback across a React interface and Go service.

React · Go · Docker

Accessibility Microservice

A lightweight scanner for static HTML with AI-enriched accessibility reports.

Node.js · JSDOM

EDUCATION

Graduate coursework in Computer Science

Technische Universität
Berlin · 04/2017–
12/2020

Coursework: Machine
Learning, Database
Systems, Computer
Graphics, Advanced Web
Development

LANGUAGES

English — professional working proficiency

German — B1 certified

Urdu — native

Punjabi — native

B.Sc. Computer Science

GIFT University ·
09/2011–10/2015

Coursework: Object-
Oriented Programming,
Data Structures,
Database Systems, Web
Programming, Software
Engineering
