Summary

Senior frontend-leaning software engineer with 8+ years of experience delivering production web applications across nonprofit, civic-tech and early-stage product environments. Deep expertise in React, Next.js and TypeScript, with hands-on backend experience in Django, FastAPI, Node.js and Ruby on Rails. Experienced in taking products from requirements and architecture through implementation and production, modernising legacy systems, and improving accessibility and performance.

Core Expertise

Frontend: React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, HTML, CSS

Backend: Python, Django, FastAPI, Node.js, Ruby on Rails, REST APIs

Data and applied AI: PostgreSQL, MySQL, vector databases, RAG, LLM integration

Architecture and delivery: application architecture, frontend architecture, API design, requirements engineering, service integration, code review, Docker, CI/CD, automated testing

Experience

Senior Full-Stack Engineer, Velsa Technologies, Berlin

08/2025 - 05/2026

Tech Stack: React.js, FastAPI, Python, Django, LLM, RAG, Stripe

- Designed the application architecture and integration flow for an AI-assisted contract workflow connecting a React/TypeScript editor, Django backend and FastAPI AI service.
- Owned end-to-end delivery across the editor, application backend, AI service and production integration.
- Built a browser-based contract editor supporting merge fields, inline option controls and conditional clauses.
- Developed a conversational workflow that collected structured input and populated contract content through backend APIs.
- Designed and deployed a FastAPI service integrating LLM inference and vector retrieval with the existing Django platform.
- Integrated Stripe payment and webhook flows for contract purchasing and controlled document access.

Software Engineer / Web Developer, Tactical Tech (NGO), Berlin, Remote

08/2019 - 03/2025

Tech Stack: React.js, Vue.js, Next.js, Nuxt.js, TypeScript, WCAG 2.1

- Led the technical modernisation of Exposing the Invisible (ETI), owning architecture and implementation decisions for its React-to-Vue and CMS migrations.
- Modernised Tactical Tech's main website from React to Next.js and delivered Influence Industry from planning through deployment, alongside work on The Glass Room, Data Detox Kit, Everything Will Be Fine and Digital Enquirer.
- Built and maintained reusable Content API and Search API services and consent-management functionality supporting GDPR-compliant workflows; improved CMS workflows and investigated issues across the application stack.
- Worked with project managers, researchers, designers and editors to turn requirements and Figma designs into implementation plans and reusable, responsive, accessible components, from planning and architecture discussions through code review.
- Improved performance, accessibility, maintainability and developer experience across production applications, including 30% faster initial loads and more than 50% faster editorial workflows.

Full-Stack Developer (Working Student), Durch die Stadt GmbH, Berlin

06/2018 - 08/2019

Tech Stack: Ruby on Rails, Vue.js, Nuxt.js, PostgreSQL, Mapbox

- Designed RESTful APIs in Ruby on Rails and integrated them with Vue.js and Nuxt.js frontends using Vuex state management.
- Built modular responsive UI components with Bulma CSS and BEM methodology for scalable styling.
- Developed immersive 360-degree city and retail exploration portals using Mapbox, Leaflet, and KRPano.

PHP Developer (Working Student), TurboAd GmbH, Berlin

01/2018 - 05/2018

Tech Stack: Symfony 3, PHP 7, PHPUnit, Doctrine ORM, MySQL

- Built web applications with Symfony 3 and Doctrine ORM for relational data modeling and query optimization.
- Improved code reliability through test-driven development with PHPUnit on critical application paths.

Ruby on Rails Developer (Freelance), Octasolutions, Gujranwala

01/2016 - 11/2016

Tech Stack: Ruby on Rails, MySQL, JavaScript, Bootstrap

- Built full-stack web applications with admin dashboards, role-based authentication, and responsive frontends.

Open Source Projects

Jobs Tracker Bot: <https://github.com/saqibroy/jobs-tracker-bot> - Python, GitHub Actions, Docker; async aggregator monitoring 11 remote job boards with NGO role classification and Discord/Telegram alerts.

Web Crawler Dashboard: <https://github.com/saqibroy/web-crawler-dashboard> - React, Go, Docker; URL analyzer with broken-link detection, heading analysis, login-form detection, real-time crawl status, and JWT authentication.

Accessibility Microservice: <https://github.com/saqibroy/accessibility-check-microservice> - Node.js, JSDOM; lightweight WCAG 2.1 A/AA scanner for static HTML and AI-enriched accessibility reports.

Education

Graduate coursework in Computer Science, Technische Universitaet Berlin, Berlin, Germany

04/2017 - 12/2020

Coursework: Machine Learning, Database Systems, Computer Graphics, Advanced Web Development

B.Sc. Computer Science, GIFT University, Gujranwala, Pakistan

09/2011 - 10/2015

Coursework: OOP, Data Structures, Database Systems, Web Programming, Software Engineering

Volunteer & Leadership

President, Pakistan Student Association, Berlin, Germany

09/2018 - 09/2019

Organized welcome events for 100+ new students and coordinated sports events including cricket tournaments.

Additional Training

Community Basic Life Support & Fire Safety Training | 09/2012

Punjab Emergency Service (Rescue 1122), Gujranwala, Pakistan

Completed a community orientation course in basic life support and fire safety.

Languages
