| Summary

Senior frontend-leaning software engineer with 8+ years of experience delivering production web applications across nonprofit, civic-tech and early-stage product environments. Deep expertise in React, Next.js and TypeScript, with hands-on backend experience in Django, FastAPI, Node.js and Ruby on Rails. Experienced in taking products from requirements and architecture through implementation and production, modernising legacy systems, and improving accessibility and performance.

| Core Expertise

Frontend	React, Next.js, TypeScript, JavaScript, Vue.js, Nuxt.js, HTML, CSS
Backend	Python, Django, FastAPI, Node.js, Ruby on Rails, REST APIs
Data & AI	PostgreSQL, MySQL, vector databases, RAG, LLM integration
Architecture	application architecture, frontend architecture, API design, requirements engineering, service integration, code review, Docker, CI/CD, automated testing

| Experience

- 08/2025–05/2026 • **Senior Full-Stack Engineer, Velsa Technologies, Berlin**
- **React.js ▪ FastAPI ▪ Python ▪ Django ▪ LLM ▪ RAG ▪ Stripe**
 - Designed the application architecture and integration flow for an AI-assisted contract workflow connecting a React/TypeScript editor, Django backend and FastAPI AI service
 - Owned end-to-end delivery across the editor, application backend, AI service and production integration
 - Built a browser-based contract editor supporting merge fields, inline option controls and conditional clauses
 - Developed a conversational workflow that collected structured input and populated contract content through backend APIs
 - Designed and deployed a FastAPI service integrating LLM inference and vector retrieval with the existing Django platform
 - Integrated Stripe payment and webhook flows for contract purchasing and controlled document access
- 08/2019–03/2025 • **Software Engineer / Web Developer, Tactical Tech (NGO), Berlin (Remote)**
- **React.js ▪ Vue.js ▪ Next.js ▪ Nuxt.js ▪ TypeScript ▪ WCAG 2.1**
 - Led the technical modernisation of Exposing the Invisible (ETI), owning architecture and implementation decisions for its React-to-Vue and CMS migrations
 - Modernised Tactical Tech's main website from React to Next.js and delivered Influence Industry from planning through deployment, alongside work on The Glass Room, Data Detox Kit, Everything Will Be Fine and Digital Enquirer
 - Built and maintained reusable Content API and Search API services and consent-management functionality supporting GDPR-compliant workflows; improved CMS workflows and investigated issues across the application stack
 - Worked with project managers, researchers, designers and editors to turn requirements and Figma designs into implementation plans and reusable, responsive, accessible components, from planning and architecture discussions through code review
 - Improved performance, accessibility, maintainability and developer experience across production applications, including 30% faster initial loads and more than 50% faster editorial workflows
- 06/2018–08/2019 • **Full-Stack Developer (Working Student), Durch die Stadt GmbH, Berlin**
- **Ruby on Rails ▪ Vue.js ▪ Nuxt.js ▪ PostgreSQL ▪ Mapbox**
 - Designed RESTful APIs in Ruby on Rails and integrated them with a Vue.js/Nuxt.js frontend using Vuex for state management
 - Built modular, responsive UI components with Bulma CSS and BEM methodology for scalable, maintainable styling
 - Developed immersive 360° city and retail exploration portals using Mapbox, Leaflet, and KR pano
 - Maintained high test coverage with RSpec and Jest, enforcing code quality through CI pipelines

01/2018–05/2018

PHP Developer (Working Student), *TurboAd GmbH*, Berlin

- **Symfony 3** ■ **PHP 7** ■ **PHPUnit** ■ **Doctrine ORM** ■ **MySQL**
- Built web applications using Symfony 3 with Doctrine ORM for relational data modelling and query optimization
- Ensured code reliability through Test-Driven Development with PHPUnit, achieving high coverage on critical paths

01/2016–11/2016

Ruby on Rails Developer (Freelance), *Octasolutions*, Gujranwala

- **Ruby on Rails** ■ **MySQL** ■ **JavaScript** ■ **Bootstrap**
- Built full-stack web applications with admin dashboards, role-based authentication, and responsive front-ends

| Open-Source

- **Jobs Tracker Bot**, *github.com/saqibroy/jobs-tracker-bot*, Python, GitHub Actions, Docker
Async aggregator that monitors 11 remote job boards, classifies NGO roles, and sends rich Discord/Telegram alerts, with CI/CD deployment to Oracle Cloud
- **Web Crawler Dashboard**, *github.com/saqibroy/web-crawler-dashboard*, React, Go, Docker
Full-stack URL analyser with a Go/Gin backend and React dashboard that detects broken links, heading structure, and login forms with real-time crawl status and JWT auth
- **Accessibility Microservice**, *github.com/saqibroy/accessibility-check-microservice*, Node.js, JSDOM
Lightweight WCAG 2.1 A/AA scanner that audits static HTML without a headless browser, powering AI-enriched accessibility reports

| Education

04/2017–12/2020

Graduate coursework in Computer Science, *Technische Universität Berlin*, Berlin, Germany
Machine Learning, Database Systems, Computer Graphics, Advanced Web Development

09/2011–10/2015

B.Sc. Computer Science, *GIFT University*, Gujranwala, Pakistan
OOP, Data Structures, Database Systems, Web Programming, Software Engineering

| Volunteer & Leadership

09/2018–09/2019

President, *Pakistan Student Association*, Berlin, Germany
Organized welcome events for 100+ new students; coordinated sports events including cricket tournaments

| Additional Training

09/2012

Community Basic Life Support & Fire Safety Training
Punjab Emergency Service (Rescue 1122), Gujranwala, Pakistan — Completed a community orientation course in basic life support and fire safety

| Languages

English Professional working proficiency
German B1 certified
Urdu, Punjabi Native
